

Carol Pride's Lab Group at SSU

- Impacts of Ossabaw Isl. Causeway construction and hydrology on core diatom record (Kris Russell, Jay Hodgson/GSU)
- PAHs at Savannah area boat ramps and fishing piers (blue crabs) (Ryan Jinks)
- Tidal creek diatoms, *Akashiwo sanguinea*, and potential septic influences (Jenn Colley)
- Exploration of GA estuarine salt marsh foraminifera in association with vegetation type (elevation, inundation) (Meghan Maylone)
- Salt marsh sedimentation rates (Nat Campbell)

Marine Science Research Center at SSU

- New research facility
 - mesocosm lab
 - 7 research labs
 - 2nd dock
- *R/V Margaret C. Robinson* COI, estuarine and inner shelf work
- Research areas
 - Ocean acidification
 - Ecotoxicology
 - Marine mammals
 - Bioacoustics
 - Estuarine fish ecology
 - Benthic ecology

Department of Marine and Environmental Sciences

1 contributor of African-American B.S. and M.S. degree recipients in the Ocean Sciences (IPEDS data, 2018)

Production of Marine Biology / Biological Oceanography graduates:

28th in the nation undergraduate

20th in nation for master's degree graduates

(Lettrich conference presentation, IPEDS data, 2014)
