

The Georgia Coastal Management Program Sustains, Protects, Enhances and Conserves Coastal Resources for our communities through seven areas of service.

Georgia Coastal Management Program

Wetlands Health & Restoration

Jaynie L. Gaskin, Wetlands Biologist

Coastal Aquatic Barrier Assessment & Analysis

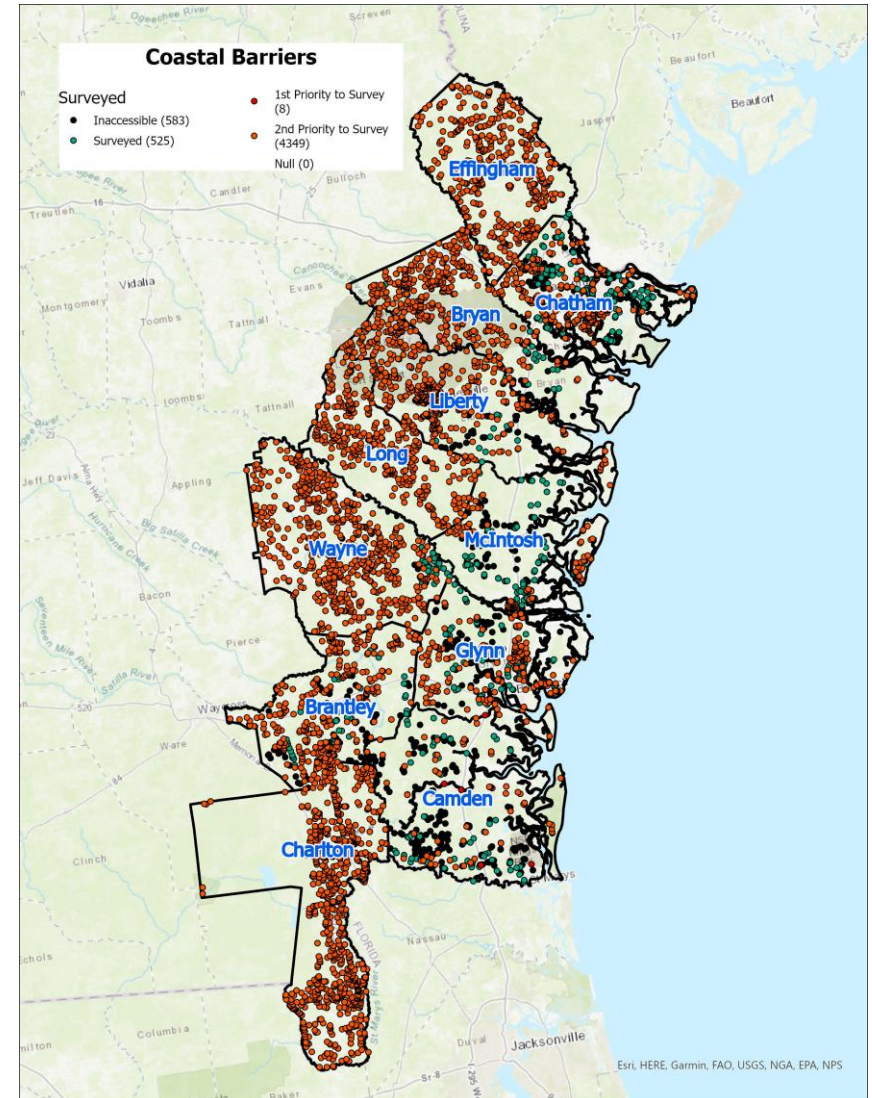

- Survey of road-stream crossings in tidal wetlands
- Inventory of barriers in eleven coastal counties
- Prioritize for restoration

- Leverage funds from NFWF & BIL
- Assessment team of two technicians reporting to CRD biologist
- Surveys started May 2023

Coastal Aquatic Barrier Assessment & Analysis

- Progress:
- Assessed: 1,108
- Surveyed: 525
- Severe Constriction: 51
- Moderate: 39
- Minor: 33
- Remaining Barriers: 4,357
- Assessments are funded for the next two years

Coastal Aquatic Barrier Assessment & Analysis

- Needs:
 - Fish Passage Information
 - Presence / absence of species of interest to granting agencies
 - Hydrologic connectivity assessments through watersheds
 - Community connections
 - Restoration funding support
